

AKS robo-kut plasma beveling head

Reach a New Dimension In Plasma Beveling.

- Rigid high tech design provides most compact lightweight unit (50 lbs.)
- Revolutionary design eliminates torch lead wind-up inherent with other beveling systems.
- Smooth and accurate motion allows beveling of small holes to minimize angularity associated with plasma cutting.
- Patent Pending automatic calibration/set-up.
- Compact lightweight design can be installed on precision unitized cutting machines.

Improve your weld fit-up and productivity with the revolutionary AKS robo-kut plasma beveling system.
